

American Time Use Survey (ATUS) Data Dictionary:

2003-16 Interview Data

Variables collected in ATUS

July 2017

Important Information about the ATUS Data Dictionary

Introduction

The American Time Use Survey (ATUS) is sponsored by the Bureau of Labor Statistics and conducted by the U.S. Census Bureau. The purpose of this document is to provide information about the variables available on six multi-year ATUS data files: the Respondent file, the Roster file, the Activity file, the Who file, the Eldercare Respondent file, and the Activity Summary file. These files contain information collected and assigned in the 2003 to 2016 ATUS interviews. This data dictionary differs from individual year data dictionaries because it describes files that have data from multiple years.

This data dictionary lists all the variables available on these multi-year files and their valid values. It also provides directions on how to read the data dictionary.

Three additional data dictionaries describe other ATUS data files:

- **ATUS-CPS Data Dictionary:** Describes the variables available on the ATUS-CPS file as well as some variables on the Activity Summary file. The ATUS-CPS file contains data from the Current Population Survey (CPS) for persons selected to be surveyed for the ATUS and for members of their households. (The information on the ATUS-CPS file was collected two to five months before the ATUS interview and in some cases was out of date at the time the ATUS was conducted.) This dictionary is available for both multi-year and single-year ATUS-CPS data files.
- **ATUS Survey Methodology Data Dictionary:** Describes the variables available on the single-year Case History and Call History files. This data dictionary is only available for single-year Case History and Call History files because there are no multi-year Case History and Call History files.
- **Trips Data Dictionary:** Starting in 2011, the trips questions were replaced by the eldercare questions. The data dictionary describes the variables on the Trips files, which are available for the years, 2005-10. This data dictionary is only available for single-year Trips files because there are no multi-year Trips files.

These additional single- and multi-year data dictionaries are available on the ATUS Web site at www.bls.gov/tus/dictionaries.htm.

ATUS Interview Data Files

The following six multi-year data files include data available from the ATUS interviews.

1. 2003-16 ATUS Respondent File

This file contains case-specific variables collected in all currently available years of the ATUS (that is, variables for which there is one value for each respondent). These include, for example, labor force and earnings information, total time providing secondary childcare, and ATUS statistical weights. The ATUS statistical weights variable (TUFNWGTP) was developed using the 2006 weighting method. For more information about ATUS statistical weights, why researchers should use them, and details about the ATUS weighting methods, see the ATUS User's Guide (www.bls.gov/tus/atususersguide.pdf).

There is one record for each ATUS respondent.

Below is a simplified example. The TUCASEID identifies each household, and TULINENO identifies each individual within the household. The example contains responses from five individuals; note that the respondent always has TULINENO=1. In the example, each respondent has corresponding values denoting school enrollment (TESCHENR), labor force status (TELS), and total nonwork-related time spent alone (TRTALONE). The actual ATUS Respondent file contains many more variables as well as many more lines.

TUCASEID	TULINENO	TESCHENR	TELS	TRTALONE
20160101020210	1	1	1	40
20160101020211	1	1	1	350
20160101020212	1	1	5	0
20160101020213	1	2	5	556
20160101020214	1	1	4	100

2. 2003-16 ATUS Roster File

This file contains information on the age, sex, and each household member's relationship to the ATUS respondent. The same information is also included for the respondent's own nonhousehold children under 18.

There is one record for each individual in the respondent's household (including the respondent's own nonhousehold children under 18).

A simplified example appears below. The TUCASEID identifies each household, and the TULINENO identifies each individual in the household. In the example below, TUCASEID 20160101020210 has three persons residing in the household, and TUCASEID 20160101020211 and TUCASEID 20160101020212 each have one person. The actual ATUS Roster file contains more variables and many additional lines.

TUCASEID	TULINENO	TERRP	TESEX	TEAGE
20160101020210	1	18	2	42
20160101020210	2	20	1	45
20160101020210	3	22	1	11
20160101020211	1	18	1	65
20160101020212	1	18	2	21

3. 2003-16 ATUS Activity File

This file includes activity-level information collected in ATUS, including activity code, location, duration, activity start and stop times, and whether respondents had a child under 13 in their care during the activity. Location (or “where”) information is not collected for some selected activities (such as sleeping and grooming); a value that indicates the activity was “out of universe” for the “where” question (-1) is filled in these situations. There is one record for each activity.

A simplified example of the ATUS Activity file appears below. This is an illustration of part of one respondent’s day. Because only one person is interviewed per household, each TUCASEID on the Activity file identifies a respondent. Each activity is identified by an activity number (TUACTIONITY_N). The ATUS Activity file contains more variables describing each activity as well as many more lines than does the example below. Due to changes made to the activity lexicons in the early years of the ATUS, activity codes appear on the 2003-16 Activity file that do not appear on the single-year Activity files. A new 2003-16 Activity Coding lexicon is available at www.bls.gov/tus/lexiconnoex0316.pdf with codes that appear on the 2003-16 Activity file.

TUCASEID	TUACTIONITY_N	TUSTARTTIM	TUSTOPTIME
20160101020210	1	04:00:00	07:00:00
20160101020210	2	07:00:00	07:30:00
20160101020210	3	07:30:00	08:00:00
20160101020210	4	08:00:00	12:00:00
20160101020210	5	12:00:00	13:30:00
20160101020210	6	13:30:00	17:30:00
20160101020210	7	17:30:00	18:00:00
20160101020210	8	18:00:00	19:00:00
20160101020210	9	19:00:00	21:00:00
20160101020210	10	21:00:00	04:00:00

4. 2003-16 ATUS Who File

This file includes codes that indicate who was present during each activity.

There is one record for each “who” code reported. Therefore, there will be one record for activities done alone and multiple records for activities with multiple people present. For some activities, no “who” codes are collected (such as sleeping and grooming in all years, and working in 2003-09); a value that indicates the activity was “out of universe” for the “who” question (-1) is filled in these situations.

A simplified example appears below. In the first activity (TUACTIONITY_N = 1), no “who” code information was collected because of the associated activity code. Only one person was with the respondent during the second activity, so there is one line for TUACTIONITY_N = 2. Three people were with the respondent during the third activity, so there are three lines for TUACTIONITY_N = 3. Two of those (TUWHO_CODE = 20 and 22) are members of the respondent’s household and can be linked to the Roster file using TUCASEID and TULINENO. The third (TUWHO_CODE = 51) is not a member of the respondent’s household and thus does not have a positive value for TULINENO.

The actual ATUS Who file contains more variables for each line as well as many additional lines than the example below.

TUCASEID	TUACTIONITY_N	TUWHO_CODE	TULINENO
20160101020210	1	-1	-1
20160101020210	2	22	3
20160101020210	3	20	2
20160101020210	3	22	3
20160101020210	3	51	-1

5. 2011-16 ATUS Eldercare Roster File (introduced in 2011)

The ATUS Eldercare Roster file contains information about people for whom the respondent provided care. If the respondent indicated that she had provided eldercare more than once, during the past 3 to 4 months, additional information about each eldercare recipient is collected. (The time frame varied slightly by respondent because the question asked about care provided between the 1st of a reference month and the interview day.) There is one record for each recipient, up to a maximum of 5 records for each respondent. Information about the relationship of the recipient to the respondent, the age of the recipient, and the duration that care had been provided appear on the file.

A simplified example of the ATUS Eldercare Roster file appears below. The TUCASEID identifies each respondent providing eldercare, and the TULINENO identifies recipients in the household. A value of -1 for TULINENO indicates that the eldercare recipient does not live in the household. In the example below, TUCASEID 20160101020210 provided care to two persons not living in the household, TUCASEID 20160101020211 provided care to one person, who does live in the household, and TUCASEID 20160101020215 and TUCASEID 20160101020218 each provided care to one person. The actual ATUS Eldercare Roster file contains more variables and many additional lines.

TUCASEID	TULINENO	TEELWHO	TEAGE_EC	TEELDUR
20160101020210	-1	33	76	4
20160101020210	-1	34	80	4
20160101020211	2	20	72	4
20160101020215	-1	46	88	3
20160101020218	-1	55	65	2

6. 2003-16 ATUS Activity Summary File

The ATUS Activity Summary file contains information about the total number of minutes each respondent spent doing each activity. The file also includes selected variables from the ATUS Respondent, ATUS Roster, and ATUS-CPS files. **The Activity Summary file contains variables not described in this data dictionary. Variables beginning with a lower-case "t" correspond to specific activity codes; definitions for each activity code can be found in the 2003-16 Activity Lexicon www.bls.gov/tus/lexiconnoex0316.pdf.**

There is one record for each ATUS respondent.

A simplified example of the ATUS Activity Summary file appears below. The variable TUCASEID is the unique identifier for each respondent and the variable TEAGE, which also appears on the ATUS Roster file, shows each respondent's age. The variable t010101 contains the total number of minutes each respondent spent doing activity 010101, "sleeping"; the variable t010102 contains the total number of minutes each respondent spent doing activity 010102, "sleeplessness."

The ATUS Activity Summary file contains more variables describing each activity as well as many more lines than the example below.

TUCASEID	TEAGE	t010101	t010102
20160101020210	26	480	0
20160101020211	53	430	30
20160101020212	76	457	0
20160101020213	16	600	0

Valid Values

Each variable has a number of valid values or a range of valid values. For example, the variable TESEX has two valid values: 1 for male and 2 for female. The variable TEAGE, on the other hand, has a range of valid values – any entry between 0 and 85 (except 81 through 84) is considered valid. Individual valid values or a range of valid values are listed under each variable in the data dictionary. A few variables have so many valid values that they are not included in the data dictionary; instead, they are provided in an appendix or a separate document. (References to these are included as a “Note” under the relevant variables in the data dictionary.) One example of such a variable is TEIO1ICD, which identifies the industry code of the respondent’s main job.

Many ATUS variables have the following possible valid values:

Value	Description
-1	Blank
-2	Don’t know
-3	Refused

Because so many variables have these possible values, they are not shown as valid entries for each variable.

TUCASEID, the primary identification number for ATUS, does not have either a list of valid values or a range of valid values.

ATUS Naming Conventions and Definitions

ATUS variables are named according to specified rules. Variables with a first character of “T” (for time use) were collected or created through the ATUS interview. Variables with any other first character (most often “P”, “G”, or “H”) were collected or created through the final CPS interview (conducted two to five months prior to the ATUS interview). All of the variables on the ATUS interview data files described in this dictionary begin with “T.”

The second and third characters of the name identify the type of variable, and the remaining characters consist of a descriptive name. The rules regarding the first two or three characters are described in the table below (note that the variables on the Activity Summary file that start with a lowercase “t” do not follow these rules):

Abbreviation	Variable Type	Definition
U	Unedited Variable	An unedited variable generally is produced by the Computer Assisted Telephone Interview (CATI) instrument, either collected or assigned during the interview. There are a few unedited variables that are computed by the processing system, such as the ATUS final weight (TUFNWGTP).
E	Edited Variable	An edited variable is one that has gone through an editing process (a process checking for consistency). Values of edited variables are almost always equal to values of the corresponding unedited variables. Data differ when a value is allocated or imputed by the processing system based on allocation rules specified in CPS or ATUS processing. Allocations are typically performed when the unedited variable contains a value of blank, "don't know," or "refused." An edited version of a variable exists only if that variable goes through an editing process. If there are no edits for a variable, then only an unedited version of that variable exists.
R	Recode	A recode is a variable calculated by the processing system from a combination of other variables on the file. For example, TRMJOC1 is the major occupation code for the respondent's main job; this is not a response to a question but rather a variable that summarizes (or “groups”) the more finely detailed occupation variable TEIO1OCD. (Note that variables with second and third characters of “RT” are summary variables.)
RT	Summary Variable	These variables summarize the amount of time respondents spent with other people or did selected activities. For example, TRTALONE gives the total amount of nonwork-related time the respondent spent alone on the diary day. Variables that summarize the amount of time respondents spent with other people rely on “who” code information and therefore do not include activities for which no “who” code information was collected, such as sleeping.
T	Topcode Flag	These variables indicate whether another variable has been topcoded, or given a maximum value. The three topcode variables on the ATUS interview data files all relate to earnings.

Using these rules, variables can be more readily understood based on their names. For example, the variable TEAGE can be broken down as follows:

- The first character “T” indicates that this variable was collected or created through the ATUS interviews
- The second character “E” indicates that this variable went through an editing process
- The final part of the variable name, “AGE,” is descriptive

Some questions asked in the ATUS interview allow for more than one response. For such multiple entry questions, there is a separate variable for each possible response. Each variable has the same descriptive name but a different (sequential) number. For example, respondents can provide up to six answers to the question “You said you have been trying to find work – how did you go about looking?” The variable names are TULKDK1, TULKDK2, TULKDK3, etc.

Not all ATUS variables are on the files. When there is an edited variable, the corresponding unedited variable is usually omitted from the files. This is typically done to protect the confidentiality of ATUS respondents as required by law. If an unedited variable is included on the files, then an edited version does not exist and the unedited version cannot be used

to identify individual respondents. In addition, some variables available on the single- year data files are not available on the 2003-16 files as a way to keep file sizes manageable. These variables are listed in Appendices B, C, D, E and F.

Allocation Flags

The 2003-16 ATUS Interview files contain two allocation flags: TRHERNAL and TRWERNAL. These allocation flags were included because of the frequency with which earnings variables are allocated in the ATUS. All other allocation flags appear only on the single-year ATUS Interview files and *not* on the multi-year files. For more information on these allocation flags, please see the single-year Interview data dictionaries, available online at www.bls.gov/tus/dictionaries.htm.

Edited Universe

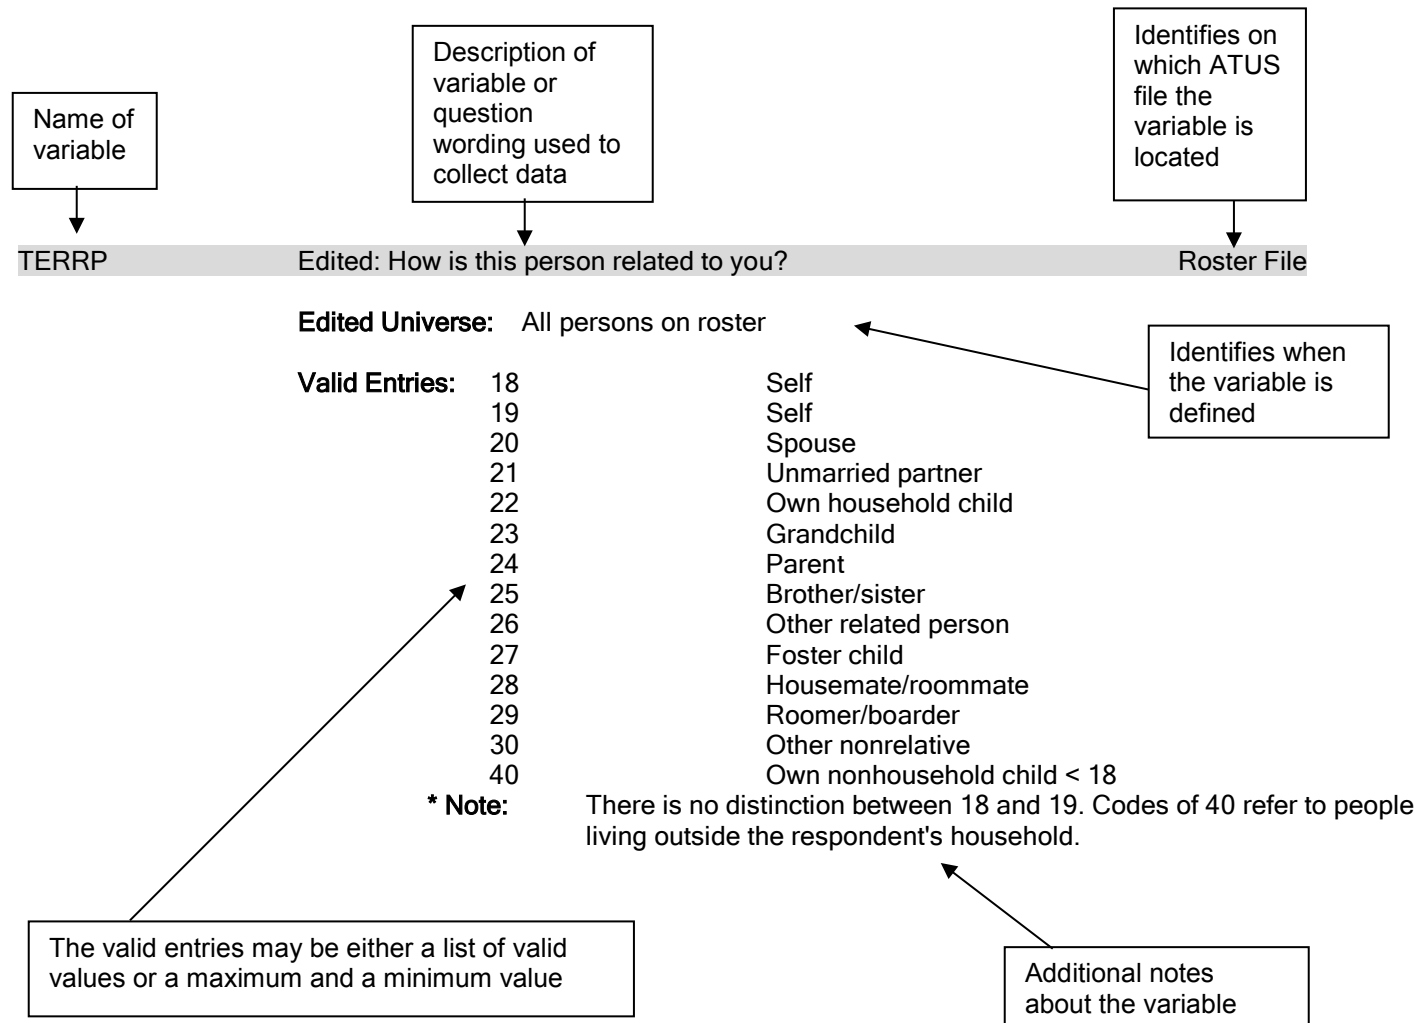

Edited variables and recodes are defined for certain universes, and these are listed in the data dictionary. For example, TEIO1OCD (occupation code) is only defined when the respondent is employed. Therefore, the universe for TEIO1OCD is TELFS = 1 or 2 (TELFS is the labor force status of the respondent, and values of 1 or 2 indicate that the respondent is employed).

Certain variables might initially appear to be the same because their descriptions are very similar. These variables are different in that they were asked of different groups of survey respondents. For example, the variables TEERNH1O and TEERNH2 both have the same question text of “Excluding overtime pay, tips, and commissions, what is your hourly rate of pay on your main job?” The difference in these two variables has to do with which respondents were asked each question. This can be determined by looking at the edited universes. TEERNH1O was asked of respondents with TEERNPER = 1, or those who said it was easiest to report their earnings hourly. TEERNH2, on the other hand, was asked of respondents with TEERNRT = 1, or those who said they were paid hourly but reported their earnings another way

Organization of the Data Dictionary

Variables are listed in the data dictionary in alphabetical order.

Below is a sample entry from the ATUS interview data dictionary:

Frequently Used Variables

The ATUS files have many variables and users may sometimes have difficulty determining which variables to use. A list of the most commonly used ATUS variables is available at www.bls.gov/tus/freqvariables.pdf.

Changes between years of ATUS data

Those using the multi-year files should be aware of changes to ATUS survey methods between years—such as new, discontinued, and changed variables—as well as differences in activity codes between years. For a list of these changes, see the document describing ATUS changes (www.bls.gov/tus/changes.pdf). Note that the multi-year files have their own Activity Coding Lexicon (www.bls.gov/tus/lexiconnoex0316.pdf) that differs somewhat from the single-year lexicons. The multi-year coding lexicon accounts for the differences in activity codes between years.

Combining multiple years of ATUS Data

The method used to generate statistical weights (the variable TUFINLWGT) on the ATUS files changed each year from 2003 to 2006. There were no changes to the method used to generate TUFINLWGT in 2007-2016. For ease of use, this multi-year data set provides statistical weights developed using the 2006 weighting method. The weighting variable has been named TUFNWGTP and it is available for all years. All other weighting variables (e.g. TU04FWGT and TU06FWGT) were removed from the multi-year files.

For more information about ATUS statistical weights, why researchers should use them, and details about how the ATUS weighting method changed, see the ATUS User's Guide (www.bls.gov/tus/atususersguide.pdf).

2003-2016 ATUS Data Dictionary: Public ATUS Interview Data

Name	Description	File
TEABSRSN	Edited: what was the main reason you were absent from your job last week?	Respondent File
	Edited Universe: TELFS = 2	
	Valid Entries: 1 On layoff (temporary or indefinite)	
	2 Slack work/business conditions	
	3 Waiting for a new job to begin	
	4 Vacation/personal days	
	5 Own illness/injury/medical problems	
	6 Childcare problems	
	7 Other family/personal obligation	
	8 Maternity/paternity leave	
	9 Labor dispute	
	10 Weather affected job	
	11 School/training	
	12 Civic/military duty	
	13 Does not work in the business	
	14 Other	
Name	Description	File
TEAGE	Edited: age	Roster File, Activity Summary File
	Edited Universe: All persons on roster	
	Valid Entries: 0 Min Value 85 Max Value	
	*Note For TUYEAR < = 2004, TEAGE is topcoded to 80. All those age 80 and above have TEAGE=80. For TUYEAR > = 2005, TEAGE is topcoded to 85. All those age 80 through 84 have TEAGE = 80. Those age 85 or above have TEAGE = 85.	
Name	Description	File
TEAGE_EC	Edited: age of eldercare recipient	EC Roster File
	Edited Universe: All eldercare recipients	
	Valid Entries: 0 Min Value 85 Max Value	
	*Note Questions about eldercare were introduced in January 2011. For household members, this is the age on the diary day; for nonhousehold members it's the person's age on the first of the month for the month corresponding to 3 months before the interview. TEAGE_EC is topcoded to 85. All those age 80 through 84 have TEAGE_EC = 80. Those age 85 or above have TEAGE_EC = 85. TXAGE_EC indicates topcoding.	

2003-2016 ATUS Data Dictionary: Public ATUS Interview Data

Name	Description		File
TEELDUR	Edited: how long have you provided care to [NAME]?		EC Roster File
	Edited Universe:	All eldercare recipients	
	Valid Entries:	1	0 to 5 months
		2	6 to 11 months
		3	1 year
		4	More than a year
	*Note	Questions about eldercare were introduced in January 2011. The name is filled with the information collected from the TUELWHO question.	

2003-2016 ATUS Data Dictionary: Public ATUS Interview Data

Name	Description		File
TEELWHO	Edited: who did you give this care to?		EC Roster File
	Edited Universe:	All eldercare recipients	
	Valid Entries:	20	Spouse
		21	Unmarried partner
		22	Own household child
		23	Grandchild
		24	Parent
		25	Brother/sister
		26	Other related person
		27	Foster child
		28	Housemate/roommate
		29	Roomer/boarder
		30	Other nonrelative

Name	Description	File
TRTNOHH	Total time spent during diary day providing secondary childcare for nonown household children < 13 (in minutes)	Respondent File
	Edited Universe: All respondents	
	Valid Entries: 0 1440	Min Value Max Value
	*Note TRTNOHH is the sum of all values of TRTNOHH_LN for each TUCASEID.	
Name	Description	File
TRTNOHH_LN	Total time spent during activity providing secondary childcare for nonown household children < 13 (in minutes)	Activity File
	Edited Universe: All activities for respondents with at least one nonown household child < 13	
	Valid Entries: 0 1440	Min Value Max Value
	*Note TRTNOHH_LN is calculated using TUCC5B. It does not include activities where TRTIER2P= 0101, 0301, 0302, 0303, and where TRCODEP= 180381. It does not include any activity or part of any activity in which no household child was awake (determined by TUCC2 and TUCC4).	
Name	Description	File
TRTO	Total time spent during diary day providing secondary childcare for own children < 13 (in minutes)	Respondent File
	Edited Universe: All respondents	
	Valid Entries: 0 1440	Min Value Max Value
	*Note TRTO is the sum of all values of TRTO_LN for each TUCASEID.	
Name	Description	File
TRTO_LN	Total time spent during activity providing secondary childcare for own children < 13 (in minutes)	Activity File
	Edited Universe: All activities for respondents with at least one own child < 13	
	Valid Entries: 0 1440	Min Value Max Value
	*Note TRTO_LN is the maximum for the activity of the following variables: TRTOHH_LN and TRTONHH_LN.	
Name	Description	File
TRTOHH	Total time spent during diary day providing secondary childcare for own household children < 13 (in minutes)	Respondent File
	Edited Universe: All respondents	
	Valid Entries: 0 1440	Min Value Max Value
	*Note TRTOHH is the sum of all values of TRTOHH_LN for each TUCASEID.	

2003-2016 ATUS Data Dictionary: Public ATUS Interview Data

Name	Description	File
TRTOHH_LN	Total time spent during activity providing secondary childcare for own household children < 13 (in minutes)	Activity File
	Edited Universe: All activities for respondents with at least one own household child < 13	
	Valid Entries: 0 1440	Min Value Max Value
	*Note TRTOHH_LN is calculated using TUCC5. It does not include activities with TRTIER2P=0101, 0301, 0302, 0303, or with TRCODEP=180381. It does not include any activity or part of any activity in which no household child was awake (determined by TUCC2 and TUCC4).	
Name	Description	File
TRTOHHCHILD	Total nonwork-related time respondent spent with own household children < 18 (in minutes)	Respondent File
	Edited Universe: All respondents	
	Valid Entries: 0 1440	Min Value Max Value
	*Note This variable is computed using TUWHO_CODE information; time spent working and all activities for which who information is not collected, such as sleeping, are omitted from the calculation	
Name	Description	File
TRTONHH	Total time spent during diary day providing secondary childcare for own nonhousehold children < 13 (in minutes)	Respondent File
	Edited Universe: All respondents	
	Valid Entries: 0 1440	Min Value Max Value
	*Note TRTONHH is the sum of all values of TRTONHH_LN for each TUCASEID.	
Name	Description	File
TRTONHH_LN	Total time spent during activity providing secondary childcare for own nonhousehold children < 13 (in minutes)	Activity File
	Edited Universe: All activities for respondents with at least one own nonhousehold child < 13	
	Valid Entries: 0 1440	Min Value Max Value
	*Note TRTONHH_LN is calculated using TUCC7. It does not include activities with TRTIER2P of 0101, 0301, 0302, 0303, 0401, 0402, 0403, and activities with TRCODEP of 180381 or 180481.	
Name	Description	File
TRTONHHCHILD	Total nonwork-related time respondent spent with own nonhousehold children < 18 (in minutes)	Respondent File
	Edited Universe: All respondents	
	Valid Entries: 0 1440	Min Value Max Value
	*Note This variable is computed using TUWHO_CODE information; time spent working and all activities for which who information is not collected, such as sleeping, are omitted from the calculation	

2003-2016 ATUS Data Dictionary: Public ATUS Interview Data

Name	Description		File
TRTSPONLY	Total nonwork-related time respondent spent with spouse only (in minutes)		Respondent File
	Edited Universe:	All respondents	
	Valid Entries:	0 1440	Min Value Max Value
	*Note	This variable is computed using TUWHO_CODE information; time spent working and all activities for which who information is not collected, such as sleeping, are omitted from the calculation	
Name	Description		File
TRTSPOUSE	Total nonwork-related time respondent spent with spouse (others may be present) (in minutes)		Respondent File
	Edited Universe:	All respondents	
	Valid Entries:	0 1440	Min Value Max Value

APPENDIX A

ATUS industry codes use the U.S. Census Bureau's Industry Classification System, which is based on the North American Industry Classification System. Beginning with the 2014 ATUS, industry data were classified using the 2012 Census Industry Classification System. This system replaced the 2007 Census Industry Classification System. The 2007 Census Industry Classification System was incorporated beginning in the 2010 ATUS; it replaced the 2002 Census Industry Classification System, which was used by ATUS from 2003 until the 2007 classification scheme was implemented. There were only minor differences between the 2002, 2007, and 2012 Census Industry Classification Systems. For more information, please see www.bls.gov/cps/cpsoccind.htm.

Detailed Industry Code using the 2002 Census Industry Classification system (TRDTIND1)

TRDTIND1	Description	TEIO1ICD
1	Agriculture	0170-0180, 0290
2	Forestry, logging, fishing, hunting, and trapping	0190-0280
3	Mining	0370-0490
4	Construction	770
5	Nonmetallic mineral product manufacturing	2470-2590
6	Primary metals and fabricated metal products	2670-2990
7	Machinery manufacturing	3070-3290
8	Computer and electronic product manufacturing	3360-3390
9	Electrical equipment, appliance manufacturing	3470, 3490
10	Transportation equipment manufacturing	3570-3690
11	Wood product manufacturing	3770-3870
12	Furniture and fixtures manufacturing	3890
13	Miscellaneous and not specified manufacturing	3960-3990
14	Food manufacturing	1070-1290
15	Beverage and tobacco product manufacturing	1370, 1390
16	Textile, apparel, and leather manufacturing	1470-1790
17	Paper manufacturing and printing	1870-1990
18	Petroleum and coal products manufacturing	2070, 2090
19	Chemical manufacturing	2170-2290
20	Plastics and rubber products manufacturing	2370-2390
21	Wholesale trade	4070-4590
22	Retail trade	4670-5790
23	Transportation and warehousing	6070-6390
24	Utilities	0570-0690
25	Publishing industries (except internet)	6470-6490
26	Motion picture and sound recording industries	6570, 6590
27	Broadcasting (except internet)	6670
28	Internet publishing and broadcasting	6675
29	Telecommunications	6680, 6690
30	Internet service providers and data processing services	6692, 6695
31	Other information services	6770, 6780
32	Finance	6870-6970
33	Insurance	6990
34	Real estate	7070
35	Rental and leasing services	7080-7190

36	Professional, scientific, and technical services	7270-7490
37	Management of companies and enterprises	7570
38	Administrative and support services	7580-7780
39	Waste management and remediation services	7790
40	Educational services	7860-7890
41	Hospitals	8190
42	Health care services, except hospitals	7970-8180, 8270, 8290
43	Social assistance	8370-8470
44	Arts, entertainment, and recreation	8560-8590
45	Traveler accommodation	8660, 8670
46	Food services and drinking places	8680, 8690
47	Repair and maintenance	8770-8890
48	Personal and laundry services	8970-9090
49	Membership associations and organizations	9160-9190
50	Private households	9290
51	Public administration	9370-9590

51	Public administration	9370-9590

Beginning in the January 2011 ATUS, occupation data were classified using the 2010 Census Occupation Classification system. This system replaced the 2002 Census Occupation Classification system, which was used in the 2002-10 ATUS. On the 2003-16 ATUS file, cases with [TUYEAR > 2010] will have occupation data generated using the 2010 Census Occupation Classification system. Cases on the 2003-16 ATUS file with [TUYEAR ≤ 2010] will have occupation data generated using the 2002 Census Occupation Classification system. The 2011 occupation data are not strictly comparable to previous years. For more information, please see www.bls.gov/cps/cpsoccind.htm.

**Detailed Occupation Codes using the 2002 Census Occupation Classification system
(PRDTOCC1 and PRDTOCC2)**

Detailed Occupation Code	Description	Census Occupation Code (PEIO1OCD and PEIO2OCD)
1	Management Occupations	0010–0430
2	Business and financial operations occupations	0500–0950
3	Computer and mathematical science occupations	1000–1240
4	Architecture and engineering occupations	1300–1560
5	Life, Physical, and social science occupations	1600–1960
6	Community and social service occupations	2000–2060
7	Legal occupations	2100–2150
8	Education, training, and library occupations	2200–2550
9	Arts, design, entertainment, sports, and media occupations	2600–2960
10	Healthcare practitioner and technical occupations	3000–3540
11	Healthcare support occupations	3600–3650
12	Protective service occupations	3700–3950
13	Food preparation and serving related occupations	4000–4160
14	Building and grounds cleaning and maintenance occupations	4200–4250
15	Personal care and service occupations	4300–4650
16	Sales and related occupations	4700–4960
17	Office and administrative support occupations	5000–5930
18	Farming, fishing, and forestry occupations	6000–6130
19	Construction and extraction occupations	6200–6940
20	Installation, maintenance, and repair occupations	7000–7620
21	Production occupations	7700–8960
22	Transportation and material moving occupations	9000–9750

Beginning in the January 2011 ATUS, occupation data were classified using the 2010 Census Occupation Classification system. This system replaced the 2002 Census Occupation Classification system, which was used in the 2002-10 CPS. On the 2003-16 ATUS file, cases with [TUYEAR > 2010] will have occupation data generated using the 2010 Census Occupation Classification system. Cases on the 2003-16 ATUS file with [TUYEAR ≤ 2010] will have occupation data generated using the 2002 Census Occupation Classification system. The 2011 occupation data are not strictly comparable to previous years. For more information, please see www.bls.gov/cps/cpsoccind.htm.

**Detailed Occupation Codes using the 2010 Census Occupation Classification system
(TRDTOCC1)**

Appendix B:**Variables on the 2003-16 ATUS Interview files that do not appear on the single-year ATUS Interview files**

The 2003-16 ATUS files include additional variables that are not found on the single-year ATUS files. Appendix B provides a list of variables appearing on the multi-year data files, and *not* on the single-year ATUS files. It also indicates on which multi-year file you can find these variables.

Table B
Variables appearing on the 2003-16 ATUS files, but not on single-year ATUS files

Variable name	Description of variable	2003-16 Activity File	2003-16 Activity Summary File	2003-16 Roster File	2003-16 Respondent File	2003-16 Who File
		An "X" indicates the multi-year file on which the variable appears.				
TRCODEP	Multi-year six digit activity code	X				
TRTIER2P	Pooled lexicon tiers 1 and 2: First four digits of multi-year six-digit activity code.	X				
TRTIER1P	Pooled lexicon tier 1: First and second digits of multi-year six-digit activity code.	X				
TUFNWGT P	ATUS weight corresponding to 2006 weighting method		X		X	

Appendix C:
Variables on the single-year ATUS Activity files that do not appear on the 2003-16 ATUS Activity file

The 2003-16 ATUS Activity file includes most, but not all, of the variables available on the single-year ATUS Activity data files. Appendix C provides a list of variables that appear on single-year Activity files, but do *not* appear on the 2003-16 ATUS Activity file. It also indicates where you can find variables not included on the 2003-16 ATUS Activity data file. For example, an “X” in the column titled “2003 ATUS Activity file” indicates that, while the variable does not appear on the 2003-16 ATUS Activity file, it does appear on the 2003 ATUS Activity file. For more information on the variables listed below, please see the single-year data dictionaries, available online at www.bls.gov/tus/dictionaries.htm.

Table C
Variables *not* appearing on the 2003-16 ATUS Activity file, but appearing on single-year ATUS Activity files

Variable name	Description of variable	2003 ATUS Activity file	2004 ATUS Activity file	2005 ATUS Activity file	2006 ATUS Activity file	2007 – 2016 ATUS Activity files
		An “X” indicates the single-year Activity file on which the variable appears.				
TUTIER1CODE	Lexicon Tier 1: 1st and 2nd digits of 6-digit activity code	X	X	X	X	X
TUTIER2CODE	Lexicon Tier 2: 3rd and 4th digits of 6-digit activity code	X	X	X	X	X
TUTIER3CODE	Lexicon Tier 3: 5th and 6th digits of 6-digit activity code	X	X	X	X	X
TXWHERE	TEWHERE: allocation flag	X	X	X	X	X
TRCODE	Six-digit activity code					X
TRTIER2	First and second activity tiers					X

Appendix D:
Variables on the single-year ATUS Respondent files that do not appear on the 2003-16 ATUS Respondent File

The 2003-16 ATUS Respondent file includes most, but not all, of the variables available on the single-year ATUS Respondent data files. Appendix D provides a list of variables that appear on the single-year files, but *not* on the 2003-16 ATUS Respondent file. It also indicates where you can find variables not included on the 2003-16 ATUS Respondent data file. For example, an “X” in the column titled “2003 ATUS Respondent file” indicates that, while the variable does not appear on the 2003-16 ATUS Respondent file, it does appear on the 2003 ATUS Respondent file. For more information on the variables listed below, please see the single-year data dictionaries, available online at www.bls.gov/tus/dictionaries.htm.

Table D
Variables not appearing on the 2003-16 ATUS Respondent file, but appearing on single-year ATUS Respondent files

Variable name	Description of variable	ATUS 2003 Respondent file	ATUS 2004 Respondent file	ATUS 2005 Respondent file	ATUS 2006 Respondent file	ATUS 2007-2016 Respondent files
		An “X” indicates the single-year Respondent file on which the variable appears				
TU04FWGT	ATUS final weight based on 2004 weighting method	X				
TU06FWGT	ATUS final weight based on 2006 weighting method	X	X	X		
TUBNCHWGT	ATUS benchmark weight	X				
TUCC5B_CK	Reason respondent did not report secondary childcare activities for nonown household children			X	X	X
TUCC5_CK	Reason respondent did not report secondary childcare activities for own household children			X	X	X
TUERN2	Weekly overtime earnings	X	X	X	X	X
TUERNH1C	What is your hourly rate of pay on this job, excluding overtime pay, tips, or commissions?	X	X	X	X	X
TULKDK5	TULKDK1 text: (fifth method)	X	X	X	X	X

Table D
Variables not appearing on the 2003-16 ATUS Respondent file, but appearing on single-year ATUS Respondent files, cont

Variable name	Description of variable	ATUS 2003 Respondent file	ATUS 2004 Respondent file	ATUS 2005 Respondent file	ATUS 2006 Respondent file	ATUS 2007-2016 Respondent files
		An "X" indicates the single-year Respondent file on which the variable appears				
TULKDK6	TULKDK1 text: (sixth method)	X	X	X	X	X

Table D
Variables not appearing on the 2003-16 ATUS Respondent file, but appearing on single-year ATUS Respondent files, cont

Variable name	Description of variable	ATUS 2003 Respondent file	ATUS 2004 Respondent file	ATUS 2005 Respondent file	ATUS 2006 Respondent file	ATUS 2007-2016 Respondent files
		An "X" indicates the single-year Respondent file on which the variable appears.				
TXLFS	TELFS: allocation flag	X	X	X	X	X
TXLKAVL	TELKAVL: allocation flag	X	X	X	X	X
TXLKM1	TELKM1: allocation flag	X	X	X	X	X
TXMJOT	TEMJOT: allocation flag	X	X	X	X	X
TXRET1	TERET1: allocation flag	X	X	X	X	X
TXSCHENR	TESCHENR: allocation flag	X	X	X	X	X
TXSCHFT	TESCHFT: allocation flag	X	X	X	X	X
TXSCHLVL	TESCHLVL: allocation flag	X	X	X	X	X
TXSPEMPNOT	TESPEMPNOT: allocation flag	X	X	X	X	X
TXSPUHR	TESPUHRS: allocation flag	X	X	X	X	X
TXTCC	TRTCC_LN and TRTCC: allocation flag	X	X	X	X	X
TXTCCTOT	TRTCCTOT_LN and TRTCCTOT: allocation flag		X	X	X	X
TXTCOC	TRTCOC_LN and TRTCOC: allocation flag	X	X	X	X	X
TXTHH	TRTHH_LN and TRTHH: allocation flag		X	X	X	X
TXTNOHH	TRTNOHH_LN and TRTNOHH: allocation flag		X	X	X	X
TXTO	TRTO_LN and TRTO: allocation flag		X	X	X	X
TXTOHH	TRTOHH_LN and TRTOHH: allocation flag		X	X	X	X
TXTONHH	TRTONHH_LN and TRTONHH: allocation flag		X	X	X	X

Appendix E:
Variables on the single-year ATUS Roster files that do not appear on the 2003-16 ATUS Roster File

The 2003-16 ATUS Roster file includes most, but not all, of the variables available on the single-year ATUS Roster data files. Appendix E provides a list of variables that appear on the single-year ATUS Roster files, but do *not* appear on the 2003-16 ATUS Roster file. It also indicates where you can find variables not included on the 2003-16 ATUS Roster data file. For example, an “X” in the column titled “2003 ATUS Roster file” indicates that, while the variable does *not* appear on the 2003-16 ATUS Roster file, it does appear on the 2003 ATUS Roster file. For more information on the variables listed below, please see the single-year data dictionaries, available online at www.bls.gov/tus/dictionaries.htm.

Table E
Variables *not* appearing on the 2003-16 ATUS Roster file, but appearing on single-year ATUS Roster files

Variable name	Description of variable	2003 ATUS Roster file	2004 ATUS Roster file	2005 ATUS Roster file	2006 ATUS Roster file	2007-2016 ATUS Roster files
		An “X” indicates the single-year Roster file on which the variable appears.				
TURRP	Relationship to ATUS respondent	X	X			
TXAGE	TEAGE: allocation flag	X	X	X	X	X
TXRRP	TERRP: allocation flag	X	X	X	X	X
TXSEX	TESEX: allocation flag	X	X	X	X	X

Appendix F:**Variables on the single-year ATUS Eldercare Roster files that do not appear on the 2011-16 ATUS Eldercare Roster File**

The 2011-16 ATUS Eldercare Roster file includes most, but not all, of the variables available on the single-year ATUS Eldercare Roster data files. Because questions about eldercare were introduced in 2011, there are no single-year Eldercare Roster files from 2003-2010. Appendix F provides a list of variables that appear on the single-year ATUS Eldercare Roster files, but do *not* appear on the 2011-16 ATUS Eldercare Roster file. It also indicates where you can find variables not included on the 2011-16 ATUS Eldercare Roster data file. For example, an “X” in the column titled “2011 ATUS Eldercare Roster file” indicates that, while the variable does *not* appear on the 2011-16 ATUS Eldercare Roster file, it does appear on the 2011 ATUS Eldercare Roster file. For more information on the variables listed below, please see the single-year data dictionaries, available online at www.bls.gov/tus/dictionaries.htm.

Variable name	Description of variable	2011-2016 ATUS Eldercare Roster files
	An “X” indicates the single-year Roster file on which the variable appears.	
TXAGE_EC	TEAGE_EC: allocation flag	X
TXELDUR	TEELDUR: allocation flag	X
TXELWHO	TEELWHO: allocation flag	X
TXELYRS	TEELYRS: allocation flag	X
